### GENERAL DESCRIPTION

**The Magnaflux® Wet Bench Mounting System** is designed for handheld black light units such as ZB-100F, ZB-100F MB and ZB-150F SB. It includes mounting hardware for permanently affixing black lights to Magnaflux wet bench units. Once installed, black lights can be continuously adjusted to fit varying inspection needs. When it is important to bring the black light closer to the inspection area, you may purchase a Magnaflux extension.

**The Magnaflux® Black Light Flat Surface Mount Assembly** is designed with an adjustable angle for affixing hand held black lights such as ZB-100F, ZB-100F-MB and ZB-150F SB to any flat surface. When it is important to bring the black light closer to the inspection area, you may purchase a Magnaflux extension.

**The Magnaflux® Black Light Ceiling Mount Assembly** comes with hardware to permanently attach hand-held black lights, such as ZB-100F, ZB-100F-MB and ZB-150F SB to the solid roof of an inspection area. When it is important to bring the black light closer to the inspection area, you may purchase a Magnaflux extension.
